DETAILED ACTION

Final Rejection

Claim Rejections - 35 USC \$ 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. claim 1, "A glass roof assembly, comprising a roof support surface bounding roof opening"; "a material forming at least one compensation part"; an outside surface engaging on the roof support surface and which compensates for any faults, discontinuities in said inner peripheral surface, the outside surface of the compensation material running essentially parallel too and being positioned relative to a corresponding section of the roof support surface in a manner defining a space of substantially constant

height between said outside surface of the compensation material and said roof support surface for receiving a cement layer of constant thickness". Above limitations are not shown in the figures and/or lacks support in the specification and therefore fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These limitations must be shown or the feature(s) canceled from the claim(s). Applicant is requested to go through the application and ensure that the claimed matter has been described in the specification and shown in the drawing in such a way as to convey to one skilled in the art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Correction is required without adding any new matter.

Claim Rejections - 35 USC \$ 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1, 3-7, as best understood, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3612

Claims 3-7, it appears that "The glass roof" should be "The glass roof assembly" to provide proper antecedent basis.

Claims 1, 3-7 are confusing and are not clear because claimed limitations, (claim 1, "A glass roof assembly, comprising a roof support surface bounding roof opening"; "a material forming at least one compensation part"; an outside surface engaging on the roof support surface and which compensates for any faults, discontinuities in said inner peripheral surface, the outside surface of the compensation material running essentially parallel too and being positioned relative to a corresponding section of the roof support surface in a manner defining a space of substantially constant height between said outside surface of the compensation material and said roof support surface for receiving a cement layer of constant thickness"), are not shown in the figures and therefore fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These limitations must be shown or the feature(s) canceled from the claim(s). Applicant is requested to go through the application and ensure that the claimed matter has been described in the specification and shown in the drawing in such a way as to convey to one skilled in the art that the inventor(s), at the time

Art Unit: 3612

the application was filed, had possession of the claimed invention. Correction is required.

Claim Rejections - 35 USC \$ 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3-7, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Patz (6,375,254).

Regarding claims 1, 3-7, as best understood, Patz (6,375,254) discloses in Fig. 1-8 the invention as claimed to include a motor vehicle roof 1, an roof opening 2, a glass pane 5, a material 32, a stop (Fig 5), a darkening device 6, an outside surface, a support surface, and a calibration stop (Fig 5).

Response to Arguments

1. Applicant's arguments filed 8/23/04 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show, teach or suggest certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e. "movable cover" or "immovable cover"; "constant height" added new matter limitation;) are not recited in the rejected claim(s).

Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is

Application/Control Number: 10/601,192

Art Unit: 3612

filed within TWO MONTHS of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened

statutory period, then the shortened statutory period will expire on the date the

advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will

the statutory period for reply expire later than SIX MONTHS from the date of

this final action.
